Public Information Meeting

Village of Erin Wastewater, Water and Road Rehabilitation Project

The Town of Erin is hosting two public information meetings on the Village of Erin Wastewater, Water and Road Rehabilitation Project.

This project is intended to improve municipal infrastructure through wastewater servicing, water infrastructure upgrades, road rehabilitation, and sidewalk and pedestrian improvements.

A key component of the planning work is a feasibility study to determine which roads and areas of the Village can be practically serviced by a municipal wastewater system.

The meetings will also provide information on the proposed sanitary sewer connection by-law, which will establish requirements for property owners connecting to the municipal wastewater system. The project will also consider watermain and water service improvements, road rehabilitation, and sidewalk and pedestrian improvements where these works can be coordinated with the underground infrastructure.

Each session will provide an overview of the proposed work and help answer any questions residents may have regarding the project's scope, timing and potential construction impacts.

Two information sessions will be held in the Shamrock room at Centre 2000 (14 Boland Drive, Erin). The same information will be presented at both meetings, so residents only need to attend one session.

First Session: September 28, 2026, from 6:00 p.m. to 8:00 p.m. A presentation on the project will begin at 6:30 p.m.

Second Session: October 5, 2026, from 6:00 p.m. to 8:00 p.m. A presentation on the project will begin at 6:30 p.m.

Please be advised that seating in the meeting room is limited, so please plan to arrive early. If you are unable to attend either session, information presented and discussed at the meetings will be posted on the Town of Erin's website following the sessions.

We appreciate your interest and look forward to providing you with more information about this important project.
